Professional Summary

Computer Science student with experience building web and mobile applications using **C#, .NET, Java, Firebase, and SQL databases**. Skilled in backend development, database-driven systems, and application dashboards. Seeking a Software Development Internship where I can contribute to real-world systems while expanding my engineering skills.

Experience:

2025: May- August

National Registration Bureau - Industrial Attachment

Technical Skills

Programming: C#, Java, JavaScript, PHP, SQL, HTML, CSS

Frameworks & Platforms:

.NET • Blazor Server • Android SDK

Databases & Cloud:

SQL Server • MySQL • Firebase Authentication • Cloud Firestore

Tools:

Git • GitHub • Visual Studio • Android Studio • Linux

Concepts:

REST APIs • Database Design • Authentication Systems • Mobile App Development

Projects

LinkCal – Social Calendar Scheduling Mobile App

Java, Android SDK, Firebase

- Built an Android application that allows users to **link calendars with friends to coordinate schedules**.
- Implemented **secure authentication and session management** using Firebase.
- Designed **privacy controls for calendar visibility and account status**.
- Integrated **in-app messaging** for communication within the scheduling platform.

ManageMate – Employee Time Tracking & Analytics System

Blazor, C#, Entity Framework, SQL Server

- Developed a web system for tracking employee work sessions and attendance.
- Built **analytics dashboards visualizing work hours and productivity metrics**.
- Designed database models including **WorkLog and WorkSession**.

HelpingHands – Domestic Services Platform

Blazor Server, .NET

- Built backend features for a platform connecting households with domestic workers.
- Converted HTML/JavaScript designs into **Blazor Razor components**.
- Implemented authentication and backend logic.

Veridian TMS – Tenant Management System

PHP, MySQL

- Developed a system for landlords to manage tenants, rent payments, and properties.
- Implemented **PDF rent receipts and property dashboards**.
- Added **multi-image support for property listings**.

Education

The Catholic University of Eastern Africa (CUEA)

Bachelor of Science in Computer Science

Relevant Coursework:

Software Engineering, Database Systems, Computer Graphics, Information Systems Management

Mangu High School

Kenya Certificate of Secondary Education (Mean Grade A-)
